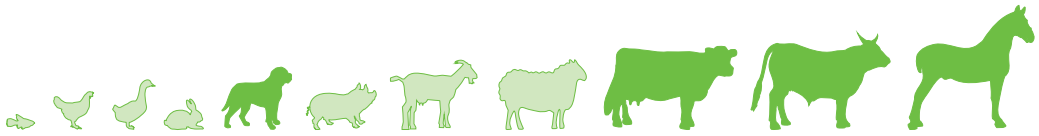
DESIAPPLE

DEHYDRATED APPLE POMACE

Healthy and tasty



Désialis

Dehydrated apple pomace is a simple and natural feed whose olfactory and nutritional qualities are preserved and stabilized by dehydration process.

DESIAPPLE derives from the production of apples grown and processed in the main French cideries : the security of a **100% traced product, FCA certified and NOPS-tested**.

A CONTROLLED AND TRACEABLE PROCESS

After extracting the juice from the apples, the pomaces are treated by the dehydration plants in which they are **simply dried and granulated**.

No physico-chemical extraction process is made; thus, all the nutrients of the original raw material are preserved. Apples are naturally **rich in cellulosic materials, organic acids and pectic**

Dehydration process allows to preserve the olfactory qualities of apples, that makes it a useful raw material for the manufacture of naturally perfumed feed ideal for the Pet Food market.

NOPS-FREE PRODUCTS

According to the FEI rules, we guarantee through this logo that our products for horse feed are systematically analyzed in accordance with a discharge control plan and are therefore **free from the main Naturally Occuring Prohibited Substances (NOPS)**.

Then, these products can be used in the composition of **race horses feedingstuffs**.
