

EQUILUZ

DEHYDRATED ALFALFA PELLETS

SPECIFIC FOR HORSES

The best alfalfa
for horses

Désialis

Made from alfalfa grown and dehydrated in France (non-GMO seeds): EQUILUZ gives the assurance of a product 100% traced and tested for **naturally occurring prohibited substances (NOPS)**.

The intrinsic properties of alfalfa, such as buffering, have a **positive impact on the digestive health of the horse.**

The high buffering capacity of alfalfa due to its calcium and protein content has a **preventive role against gastric ulcers.**

Improves the welfare of horses through **better voluntary intake**

Naturally very palatable for the horse, the EQUILUZ alfalfa presented in granulated form further improves its **palatability and voluntary ingestion by the animals.**

Physicochemical properties that improve digestibility

Appetite allows a voluntary ingestion spread throughout the day. The intake time is a key factor in the horse's activity and thus contributes to his well-being by reducing behavioral problems.

A photograph of two horses running in a grassy field. The horse in the foreground is white with grey speckles (dappled grey) and has a white mane. The horse behind it is dark brown. They are running towards the right. In the background, there is a green field, a white fence, and a line of trees. A blue vertical bar is on the right side of the image.

**EQUILUZE
CONSISTENT
AND CONSISTENT
QUALITY**

From French crops, our alfalfa is obtained from **non-GMO seeds**, since it is not authorized in Europe. Our crops, transportation to dehydration plants, dewatering tools and silos are entirely dedicated to non-GMO materials.

Our alfalfa is grown, harvested and processed according to a unique industrial process.

NOPS-FREE PRODUCTS

According to the FEI rules, we guarantee through this logo that our products for horse feed are systematically analyzed in accordance with a **discharge control plan** and are therefore **free from the main Naturally Occuring Prohibited Substances (NOPS)**. Then, these products can be **used in the composition of race horses feedingstuffs**.
