

# BIOLUZ MAX

ALFALFA DEHYDRATED IN PELLETS

**Certified organic alfalfa  
with 20% protein on dry matter**

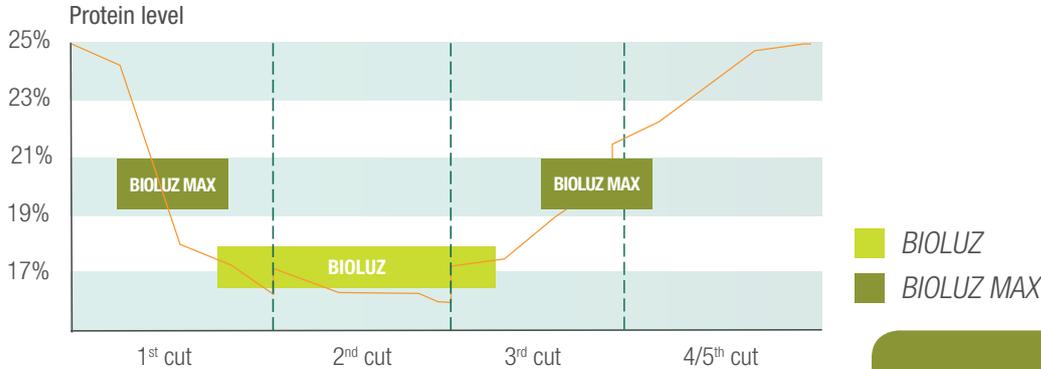

Désialis 

As a major player in animal nutrition, **Désialis** has developed a specific range from organic agriculture to meet the precise specifications of certified organic animal production.

**BIOLUZ MAX** is a bio-specific product specially developed based on its **protein and nutritional value** to meet the needs of cattle, sheep and goats.

## STANDARDIZED PROTEIN CONTENT AT 20% ON A DRY BASIS

**The selection of the production period to obtain standardized protein values at 20%**

→ Contributes to the correction of the protein level of the ration without degrading the energy level

## ORGANIC ALFALFA DEHYDRATED IN PELLETS

### GUARANTEES A RESOURCE FROM ORGANIC AGRICULTURE

→ Plots cultivated according to the principle of the specifications of the organic agriculture, harvest distinct from the conventional plots, specific preparation of the tools (cleaning and rinsing of the circuits).

**Each stage of production is controlled and controlled.**

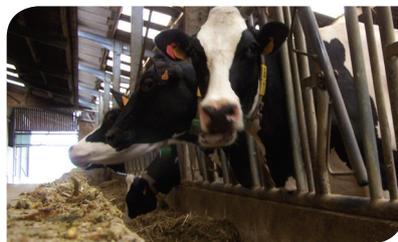

### HEALTH AND ANIMAL PRODUCTION

Supply of digestible fiber, minerals and the presence of buffer substances

→ **Promotes ruminal function**

Rich in minerals, trace elements,  $\beta$  carotene and vitamin E, alfalfa has a beneficial effect on the health and fertility of animals.

→ **Better valorization of milk and meat products**

### SECURE PROTEINS

A natural source of protein:

→ **Protected protein** intake through dehydration process, **available in the intestine**

→ Input of French proteins, which is part of the **European protein autonomy**
