HIPPOLUZ

DEHYDRATED LONG STRAND ALFALFA IN SMALL BALE 20 KG

SPECIAL HORSE

Security - Performance - Well-being

HIPPOLUZ

Désialis has developed a wide range of products, specifically designed to meet the specific requirements of animal production sectors.

Made from alfalfa grown and dehydrated in France (non-GMO seeds): Désialis alfalfa in bales gives the assurance of a product 100% traced and tested for **naturally occurring prohibited substances (NOPS)**.

CONTRIBUTES FIBER TO THE RATION

A horse's ration must contain fiber, generally provided by the hay. In case this is in deficit, a **necessary complement can be provided by HIPPOLUZ** and all the more so as the ration is rich in cereals or products derived from cereals containing starch.

In addition, the presence of fiber in the horse's ration will lead to an increase in consumption time, **modulating the food transit rate** and thus contributing to **the welfare of the animal** by reducing the frequency of occurrence of behavioural problems.

IMPACT ON THE DIGESTIVE HEALTH OF THE HORSE

Physico-chemical properties that improve digestibility

The intrinsic properties of alfalfa, such as its **buffering** capacity, have a positive impact on the digestive health of the horse.

The high buffering capacity of alfalfa due to **its calcium** and **protein content** has a preventive role against intestinal acidosis by modifying the balance of microbiota.

HIPPOLUZ: EASIER TO TRANSPORT, TO HANDLE AND TO DISTRIBUTE

- ▶ 20 kg bale with plastic straps
- ▶ 48 bagged bales per palet 6 x 8 bales 960 kg

Dehydrated long-strand alfalfa NOPS-free is also available in bales of 350 kg - RUMILUZ FIBER TM.

NOPS-FREE PRODUCTS

According to the FEI rules, we guarantee through this logo that our products for horse feed are systematically analyzed in accordance with a discharge control plan and are therefore free from the main Naturally Occuring Prohibited Substances (NOPS). Then, these products can be used in the composition of race horses feedingstuffs.
