

# HIPPOMIX FIBER

50% DESTRUCTURED ALFALFA  
50% BEET PULP SHREDS

**SPECIAL HORSE**

**A balanced mix  
for sensitive horses**

The best fibers  
**FOR BREEDERS**

Désialis

HIPPOMIX FIBER is composed of 50% destructured alfalfa (finer product) + 50% sugar pulp shreds in bales of 360 kg

Hippomix Fiber has been specially developed to reduce problems of irritation/aggression of the digestive mucous membranes in sensitive horses :

- ▶ Soft and less aggressive fibers
- ▶ Balanced intake of protein and non-starchy energy
- ▶ Improve the welfare of sensitive horses

**Improves the welfare of sensitive horses**

## HIPPOMIX FIBER, A UNIQUE PROCESS

- 50% destructured alfalfa :

Fresh alfalfa is defibered in a refiner before being pressed and then dehydrated. The destructure allows to reduce the length of the strands and to improve their fineness.

- 50% sugar pulp shreds

Dried and not granulated, they are an alternative to the traditional pulp pellets.

## HIPPOMIX FIBER, A UNIQUE PRODUCT

Hippomix Fiber is manufactured over a short production period from freshly harvested and dehydrated beet pulp and alfalfa.

## THE BENEFITS OF HIPPOMIX FIBER

The advantages of destructured alfalfa :

- ▶ High quality soft fibers
- Hippomix Fiber provides soft fiber particularly adapted to the digestive mucous membranes of fragile horses.
- ▶ A strong buffering power
- Alfalfa is a naturally anti-acid raw material. It can be used to reduce the acidity of the gastric environment and prevent the risk of ulcers.

**High quality soft fibers**

The advantages of beet pulp shreds :

- ▶ A non-starch energy source that allows to reduce the proportion of starch in the horses ration.
  - ▶ A regulated speed of ingestion.
- In shredded form, the pulp is ingested more slowly by the horses.

**A source non-starch of energy**

### ALFALFA + BEET PULP SYNERGY

Addition of beet pulp increases the digestibility of alfalfa fibers (Murray et al 2006)

## SNAP-FREE PRODUCTS

According to the FEI rules, we guarantee through this logo that our products for horse feed are systematically analyzed in accordance with a **discharge control plan** and are therefore **free from the main Naturally Occurring Prohibited Substances (NOPS)**. Then, these products can be used in the composition of race horses feedingstuffs.
