

HIPPOMIX

ALFALFA & CORN DEHYDRATED IN THE SAME GRANULE

SPECIAL HORSE

Complementary energy sources in a
single granule

Désialis 

DIVERSIFIES ENERGY SOURCES

The combination of alfalfa and corn (100% from French crops - non-GMO seeds) in a single product, HIPPO MIX, helps to improve the **efficiency of the ration** by providing energy in the form of starch and in the form of very digestible cellulose, and thus **improves intake and digestion of forage**.

Diversified sources of energy without deconcentrating the ration

CONTRIBUTES TO THE GOOD HEALTH OF HORSES

A supply of vitamins and minerals

In addition to a **good energy/protein balance**, our alfalfa-corn products are rich in minerals and trace elements and are a source of vitamins, particularly beta-carotene and vitamin E.

The nutritional qualities necessary for the **good health and vitality of horses**.

SECURES DIGESTIVE FUNCTION

The alfalfa proteins it contains as well as the corn starch both have the sought-after particularity of being **slowly degradable thanks to the dehydration**.

Few fermentations will take place in the stomach (unlike with cereals) and **all nutrients will be digested and absorbed in the intestine (starch) and the colon (fermentation of fibre)**.

Proteins and energy with slow degradation

NOPS-FREE PRODUCTS

According to the FEI rules, we guarantee through this logo that our products for horse feed are systematically analyzed in accordance with a **discharge control plan** and are therefore **free from the main Naturally Occuring Prohibited Substances (NOPS)**. Then, these products can be **used in the composition of race horses feedingstuffs**.
