

# LAPILEST

MIX OF RAW MATERIALS DEHYDRATED  
IN PELLETS

More fibre  
in rabbit feedstuffs

Désialis

LAPILEST is a combination of raw materials, based on: sugar beet pulp, grape pulp, sunflower husks, grape seed meal, grape seeds and miscanthus.

## SECURE SOURCE OF FIBRE

**LAPILEST IMPROVES  
THE DIGESTIVE HEALTH  
OF RABBITS**

LAPILEST has a high fiber content and a specific composition in hemicellulose, cellulose and lignin. This source of secure fiber improves the digestive health of rabbits. These fiber levels help reduce fattening mortalities.

## STABILITY

The combination of different raw materials makes it possible to provide a source of diversified fibers.

By limiting the variability inherent in raw materials alone.

**LAPILEST LIMITS  
THE VARIABILITY  
INHERENT IN RAW  
MATERIALS**

## SPECIFICITY

**LAPILEST IS  
FORMULATED  
ESPECIALLY WITH THE  
STAKEHOLDERS OF THE  
SECTOR**

The development of the formula is carried out in close collaboration with the main stakeholders of the rabbit industry and validated in the experimental station.
