

# LUZAMASH

ALFALFA DEHYDRATED IN PELLETS

Improved durability and suited to  
the production of blended feeds

Désialis

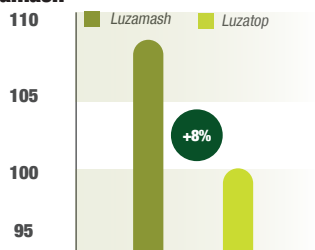

A natural source of **protein, rich in vitamins and minerals**, alfalfa has multiple nutritional benefits that are stabilised and preserved by the process of dehydration. 100% from French crops (non-GMO seeds).

LUZAMASH is a **specific product specially developed with controlled granulation and double sieving for the blenders**, while meeting the need for good performance of the product over time.

## MEETS STRENGTHENED PRODUCTION SPECIFICATIONS

**Durability measured on Luzatop and Luzamash**

The **unique organisation** of our industrial facilities allows us to homogenise batches and to formulate our products.

LUZAMASH is made from **double-sieved batches** of alfalfa that have been specially selected, tested and isolated for their durability and on the basis of uniform colour, thus meeting strengthened production specifications.

→ In addition to the good performance of the granules, the residual fines content is greatly reduced.

## PROMOTES ANIMAL HEALTH AND FERTILITY

LUZAMASH is a natural source of **protein, rich in minerals, trace elements,  $\beta$  carotene and vitamin E**. These essential nutrients have a beneficial effect on animal health and fertility.

→ A supply of essential nutrients of quality

## ALFALFA DEHYDRATED IN PELLETS

### HOMOGENEOUS AND TRACEABLE QUALITY

Made from French crops and obtained from **non-GMO seeds**  
Respecting the cutting schedule, dehydration is the mode of production that **best preserves the nutritional qualities of alfalfa**.

→ Homogenization of batches and standardization of qualities

### HEALTH AND ANIMAL PRODUCTIONS

Supply of digestible fiber, minerals and the presence of buffer substances

→ Favoring ruminal functioning

→ Rich in minerals, trace elements,  $\beta$  carotene and vitamin E, alfalfa has a beneficial effect on the **health and fertility of animals**.

→ Better valuation of **milk and meat** products

### SECURE PROTEINS

A natural source of protein:

→ **Protected protein** intake through dehydration process, available in the intestine

→ Input of **French proteins**, which is part of the European protein autonomy

### ALFALFA DEHYDRATED IN PELLETS

#### INDICATIVES VALUES AS FED

#### USAGE TIPS

Suckler cows:..... **2 to 4 kg**

Dairy cows:..... **2 to 4 kg**

Heifers:..... **1 to 2 kg**

Ewes:..... **0,5 to 1 kg**

Goats:..... **0,5 to 1 kg**
