

# RUMILUZ BIO

DEHYDRATED LONG CHOPPED ALFALFA IN BALES

**Certified alfalfa in bales**

Désialis

Organic certified animal production is becoming increasingly important, partly through consumer demand, and partly through the desire of farmers to commit to organic farming.

As a major player in animal nutrition, **Désialis has developed a specific range from organic agriculture** (100% French crops - non-GMO seeds) to meet the precise specifications of certified organic animal production

## GUARANTEES A RESOURCE FROM ORGANIC AGRICULTURE

Coming from plots cultivated according to the technical specifications of organic agriculture, **RUMILUZ BIO dehydrated alfalfa is harvested under different conditions than conventional plots** and the production process involves specific preparations (cleaning and rinsing of the circuits).

Each stage in the production of RUMILUZ BIO (harvest - manufacture - storage) is **checked and controlled**. Our unique industrial organisation, from harvest in the field through to storage of the product, allows us to ensure perfect traceability from the field to the trough, with stability of the protein levels thanks to our formulation tools. To cover protein needs as tightly as possible, **Désialis has created RUMILUZ BIO with 15% protein**.

**LONG STRAND  
CERTIFIED ORGANIC  
FARMING**

## DEHYDRATED LONG CHOPPED ALFALFA IN BALES

### BETTER RUMINATION - BETTER PERFORMANCE

→ Narrow-chopped hairs, mostly from 3 to 5 cm: **promotes rumination and saliva production**.

→ **Increases the fibrosis of the ration** helps to limit the risk of acidosis by increasing salivation.

### NUTRITIONAL BALANCE

→ Rich in minerals, trace elements ( $\beta$  carotene) and vitamin E,

→ Contributes to the **nutritional balance** of the diet and promotes the health and fertility of ruminants.

### HOMOGENEOUS AND TRACEABLE QUALITY

→ Respect of the cutting calendar in order to harvest a **plant in a vegetative state** best suited to the manufacture of our different products.

→ Dehydration process: **stabilizes the dry matter at 90%**, a guarantee of absence of losses and alterations.
