

RUMISOFT™

100% REFINED ALFALFA IN BALES

FOR HORSES

**Better fiber intake
suitable for all types of horses**

The best fibers
FOR BREEDERS

Désialis

Désialis has developed a wide range of products, specifically designed to meet the needs of the equine market. Derived from alfalfa grown and dehydrated in France from non-GMO seeds, **RUMISOFT™** ensures a product that is **100% NOPS** traced and tested, suitable for all types of horses, and is available in **320 kg** bales.

ADDS FIBRE TO THE DIET

- ▶ **RUMISOFT™, a unique manufacturing process:** fibre is removed from fresh alfalfa is refined before being squizzed and dehydrated. The **refining** process helps to reduce the length of the strands and improve their fineness (*fibre 1 cm long and a few tenths of a millimetre thick*).
- ▶ The **RUMISOFT™** provides soft fibres for the well-being of delicate horses, offering a healthy, easily chewable and digestible product.
- ▶ The homogeneity of **RUMISOFT™** makes it an essential fibrous supplement, especially since the diet is rich in cereals and derivative products that contain starch.
- ▶ The presence of fibres such as those in **RUMISOFT™** in the horse's diet will lead to **modulating the speed that food passes through and thus contributing to the animal's well-being** by reducing the frequency of behavioural disorders.

**RUMISOFT™
CONTRIBUTES TO
THE WELL-BEING OF
HORSES**

HAS A POSITIVE EFFECT ON THE DIGESTIVE HEALTH OF THE HORSE

**ITS PHYSICAL AND
CHEMICAL PROPERTIES
IMPROVE DIGESTIBILITY**

The intrinsic properties of alfalfa, such as its **buffering capacity**, have a **positive effect on the digestive health of the horse**. This high buffering capacity of alfalfa due to its levels of calcium and proteins plays a preventive role against gastric ulcers by modifying the stomach pH and the balance of microbiota.

Reducing the acidity of the environment thus makes alfalfa a preferred food for working horses as ulcers are very common in this group. It has also been shown that providing alfalfa to horses affected by gastric ulcers significantly reduced their severity (Lybbert et al, 2007).

PRODUCTS FREE OF NOPS

In accordance with FEI regulations, this logo guarantees that our horse feed products are systematically analysed according to a **liberatory control plan** and that they are thus **free from the main Naturally Occurring Prohibited Substances (NOPS)**. These products can therefore **be used as part of the feed for racehorses**.
