STROMASH BREEDING 6 MM :
Available in BULK, BIG-BAG
or 25 kg BAGS.

STROMASH BREEDING

STROMASH BREEDING : TO LIMIT THE CONCENTRATION OF RATIONS

In poultry farming, certain animals at certain periods must be given sufficiently bulky and fibrous feed to lengthen the ingestion time in order to improve their well-being and health while avoiding aggressiveness. The addition of straw in formulation can be a solution to meet these objectives. A SIMPLE AND PRACTICAL PRODUCT TO USE

STROMASH BREEDING : A SIMPLE AND PRACTICAL PRODUCT TO USE

Whether for feeding or bedding, **STROMASH BREEDING** is made with cereal straws allowing it to be used in many different situations.

The presentation of **STROMASH BREEDING** in pellets of **high durability and without dust** allows an easy handling and without dust emissions for a greater comfort of the breeders and the animals.

**STRAW
HIGH DURABILITY**

STROMASH BREEDING in 6 mm pellets is easier to handle and distribute

STROMASH BREEDING IS PRODUCED UNDER A UNIQUE INDUSTRIAL PROCESS ENSURING A HOMOGENEOUS QUALITY

The high durability of the pellets is the result of a mechanical granulation only (without addition of additives) which ensures a sufficient temperature rise **to eliminate the majority of germs**. An adapted and specific storage logistics with microbiological control during the process allows to limit any possible recontamination later.

**The assurance of
a product from a
quality chain**

STROMASH BREEDING : A TRACED QUALITY

All the cereal straws used in the composition of **STROMASH BREEDING** are secured by an FCA certified supply and are subject to a rigorous selection to limit mould and mycotoxin contamination.

100% from French crops.
