

# BIOLUZ MAX

ALFALFA DEHYDRATED IN PELLETS

**Certified organic alfalfa  
with 20% protein on dry matter**

Désialis 

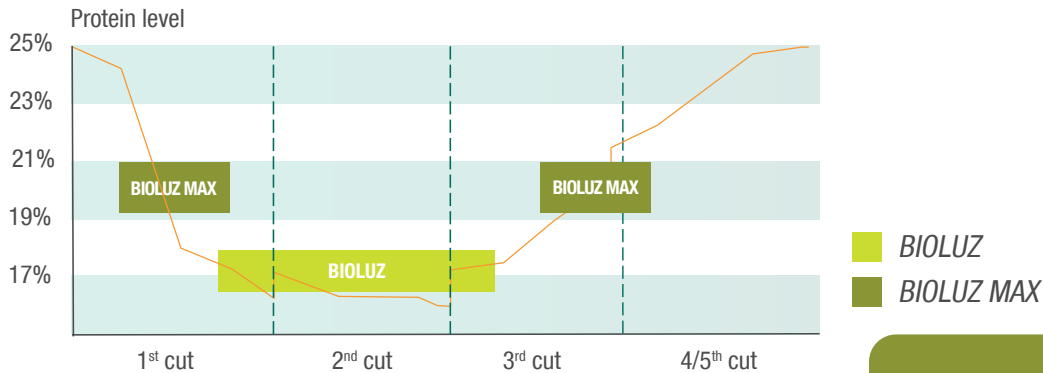

# BIOLUZ MAX

As a major player in animal nutrition, **Désialis** has developed a specific range from organic agriculture (100% from French crops - non-GMO seeds) to meet the precise specifications of certified organic animal production.

**BIOLUZ MAX** is a bio-specific product specially developed based on its protein and nutritional value to meet the needs of cattle, sheep and goats.

## STANDARDIZED PROTEIN CONTENT AT 20% ON A DRY BASIS

The selection of the production period to obtain standardized protein values at 20%

→ Contributes to the correction of the protein level of the ration without degrading the energy level

## ORGANIC ALFALFA DEHYDRATED IN PELLETS

### GUARANTEES A RESOURCE FROM ORGANIC AGRICULTURE

→ Plots cultivated according to the principle of the specifications of the organic agriculture, harvest distinct from the conventional plots, specific preparation of the tools (cleaning and rinsing of the circuits).

Each stage of production is controlled and controlled.

### HEALTH AND ANIMAL PRODUCTION

Supply of digestible fiber, minerals and the presence of buffer substances

→ Promotes ruminal function

Rich in minerals, trace elements,  $\beta$  carotene and vitamin E, alfalfa has a beneficial effect on the health and fertility of animals.

→ Better valorization of milk and meat products

### SECURE PROTEINS

A natural source of protein:

→ Protected protein intake through dehydration process, available in the intestine

→ Input of French proteins, which is part of the European protein autonomy

**Désialis**
